LIAN JIA RONG JEROME

Given Name: Jerome | Surname: Lian

Singapore | jeromelian27@gmail.com | 90508557

PROFESSIONAL SUMMARY

Analytical and adaptable business and marketing graduate with hands-on experience in business operations, logistics coordination, stakeholder management, and campaign analysis. Skilled in Excel, SQL, Python, Google Analytics, and process coordination, with exposure to strategic planning, supplier management, and data-driven decision making. Currently pursuing a Specialist Diploma in Intelligent Automation with a strong interest in Business Analysis, AI & Machine Learning, Process Improvement, and Operational Strategy.

PROFESSIONAL EXPERIENCE

Paragon Traders PTE LTD

Management Trainee / Free Lance / Business Development | Nov 2022 – Mar 2026

- Conducted market research and competitor analysis to support business growth and product launch strategies.
- Collaborated with cross-functional teams and external stakeholders to execute marketing campaigns and business initiatives.
- Assisted in budgeting, operational planning, and strategic discussions to improve organizational performance.
- Supported sourcing activities, supplier engagement, and manufacturing coordination across operational functions.
- Analyzed campaign and sales performance trends to support data-driven business decisions and reporting.
- Represented the company at trade expos and supplier meetings to support sourcing and business development opportunities.
- Maintained operational documentation and records to support reporting and internal business processes.

Paul Hype Page Co

AI and Business Consultant Intern | September 2026-October 2026(short-term project-based internship)

- Lead Phase 1 of the development of an email filter that links up to the CRM to help protect against phishing attacks and spam by cross referencing incoming emails with the company's CRM verify whether they are from a known source. Unknown sources are flagged for review. Additionally has the option to run incoming emails through an additional generic spam/scam filter (trained via Naïve Bayes model)
- Co-lead the development of an internal tool to draft email responses. Responses are trained based on past company email response data. Emails are logged both when they are drafted and when they are sent to further train the model based on what changes a person has made to the drafted email.
- Developed a customizable program which automated a process which involved receiving physical mail and alerting the relevant clients about the arrival of their mail via email.
- General admin operations work, processing documents containing sensitive client information
- Conducting general research on AI like exploring potential LLMs, researching the use of different APIs, and looking into frontier developments in the industry.

Republic of Singapore Air Force (RSAF)

S1 / Human Resources Branch – Changi Airbase West (ACC) | Oct 2020 – Oct 2022

- Supported HR operations, personnel administration, and logistics coordination in a high-accountability environment.
- Managed personnel documentation and operational records while ensuring accuracy and compliance.

- Demonstrated strong organizational, communication, and problem-solving skills while supporting daily branch operations.

EDUCATION

- Murdoch University Singapore – Double Major in International Business & Marketing (2022 – 2025)
- Ngee Ann Polytechnic – Specialist Diploma in Intelligent Automation (Part-Time) (2026 – 2027)
- Kaplan Singapore – Diploma in Logistics and Supply Chain Management (2019 – 2020)
- Republic Polytechnic – Infocomm Security Management (2016 – 2019)
- St. Andrew's Secondary School – O-Level & N-Level Certifications

PROJECTS

Market research for Insurtech: Analyzed the demand for Insurtech to determine whether a popup/physical location would be viable, along with the potential locations where it could be set up, based on the volume of foot traffic of the target customers.

F&B overseas expansion research: Did research on the viability of a well-established local company's possible expansion into the Middle East, based on demand, availability of similar products, potential supply chain risks, cost, and average income in the area.

Business RPA solution development: Worked as a liaison between a team of students at Singapore Polytechnic and a local business to develop a personalized RPA to streamline and automate production and warehousing of locally made products. Main duties included taking the company's demands and working with the SP team to translate those demands into viable solutions and relaying the team's progress to the company in a presentable format.

Client Email Reminders — built a Windows desktop app (Python/Tkinter) that automates drafting client reminder emails through Outlook COM automation for a 2,000+ company client base.

- Designed a distributed data-sync system (auditable change log + merge-on-update) allowing multiple independent installs to safely contribute to one central dataset with zero data loss.
- Built an automated release pipeline (PyInstaller, Inno Setup, GitHub CLI) and a COM-automation tool that recovered missing contact data for 90 accounts from 2,000+ historical emails.
- Integrated Zoho CRM (read-only) for contact import and automatic subscription-status tracking.
